Software Engineer | AI systems, data pipelines, and full-stack applications

EXPERIENCE

Acculevel

June 2026 – Present

Software AI Engineer

Lafayette, IN

- Built the company's in-house **CRM**, replacing the **Workiz** field-service platform across sales, scheduling and job operations, shipped in **four months** and retiring roughly **\$500K a year** in subscription spend.
- Solely re-architected the **medallion** data platform around the CRM and ERP so dashboards stay current, moved **Power BI** reporting into the ERP and cut **Databricks** to a few jobs, retiring about **\$50K a year**.
- Sole engineer on a review-attribution service deciding commissions, now integrated with the **ERP: FastAPI, React and Postgres** replacing a low-code workflow, Google SSO lifting coverage **from 63% to 99%**.
- Shipped two read-only **Model Context Protocol (MCP) servers** exposing Google Business Profile and Search Console as tools, so the marketing team runs ranking and traffic-drop analysis directly in **Claude**.
- Cut **25 hours a week** of manual publishing with a daily **Databricks** pipeline that screens job-site photos with **Claude vision** for relevance and privacy risk before posting to the nearest stale listing.

GovieRates

Apr 2026 – May 2026

Software Engineer Intern

Largo, MD

- Delivered an end-to-end onboarding flow with SSO JWT entry, **Stripe** subscription billing and automated multi-tenant provisioning, onboarding **30+ clients** and adding **\$5,000/month** in recurring revenue.

Infosys

Aug 2021 – Dec 2023

Software Engineer

Hyderabad, India

- Traced per-keystroke latency to a full-table scan, re-ranked the knowledge graph on **node degree count** to shrink the candidate set and moved the payload to **Protobuf**, cutting response time from **~200ms to ~20-30ms**.
- Extended the search layer with **LLMs** that translate natural-language questions into **Cypher**, lifting NLU accuracy from **85% to 92%**; integrated a **Graph Neural Network** microservice for link prediction.
- Simplified microservice serialization into a lean payload, cutting network traffic **68%, 465KB to 148KB**.
- Led a team of three to automate regression testing, eliminating **20 hours** of manual QA effort per release.

EDUCATION

University of Maryland, College Park

Jan 2024 – Dec 2025

Master of Engineering, Software Engineering | GPA: 3.93

College Park, MD

ACHIEVEMENTS, CERTIFICATIONS & PUBLICATIONS

- Top 100 Rank (Top 0.06%)**, HackwithInfy National Coding Competition (167,000+ participants); **Runner-up among 95 teams**, WatsonX Chatbot Challenge | [Submission](#)
- Solved 600+** advanced algorithmic problems; highest rating CodeChef 1799, CodeForces 1370.
- Claude Code in Action** by Anthropic | [Credential](#) · Published in IJRAR: NLP sentiment analysis | [Paper](#)

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, Cypher (Graph Query), Shell Scripting

AI/ML: LLM integration (Claude, OpenAI, Gemini), RAG, LangChain, LangGraph, MCP servers, vision pipelines, PyTorch, TensorFlow

Backend: FastAPI, Spring Boot, Flask, Node.js, REST, GraphQL, gRPC

Frontend: Angular, React, Next.js, RxJS, Tailwind

Cloud & Data: Azure (App Service, Functions, Key Vault, Postgres), AWS (Lambda, SageMaker, S3, API Gateway), Databricks, PostgreSQL, MongoDB, Neo4j, Redis

DevOps & Tools: Docker, Kubernetes, NGINX, Cloudflare, GitHub Actions, CI/CD, Vercel, n8n, Airtable, Claude Code, Cursor, Git, Postman
