EXPERIENCE

Acculevel

June 2026 – Present

Software AI Engineer

Lafayette, IN

- Sole engineer on a review-attribution platform from requirements to production, replacing an untestable low-code workflow that decided salesperson commissions; **FastAPI, React and Postgres on Azure** across **200 Google Business Profiles**.
- Raised review-attribution accuracy **from 63% to 99%** by adding **Google SSO** to the existing QR flow, replacing an inference from appointment time and listing with a direct identity match.
- Built and shipped a **Model Context Protocol (MCP) server** exposing Google Business Profile and Search Console as **Claude**-queryable tools, read-only by construction, so executives run ranking, decay and traffic-drop analysis without manual pulls.
- Cut **25 hours a week** of manual publishing with a daily **Databricks** pipeline that screens job-site photos with **Claude vision** for relevance and privacy risk before posting to the stalest listing.

GovieRates

Mar 2026 – May 2026

Software Engineer - Intern

Largo, MD

- Integrated a new timesheet product with the existing accounting platform through a **Java Spring Boot** middleware API, keeping shared client records consistent across two systems of record without manual reconciliation.
- Delivered an end-to-end onboarding flow with SSO JWT entry, **Stripe** subscription billing and automated multi-tenant provisioning, onboarding **30+ clients** and adding **\$5,000/month** in recurring revenue.

Infosys

May 2021 – Dec 2023

Software Engineer

Hyderabad, India

- Diagnosed a latency bottleneck in the search suggestion API and re-architected the **Cypher** query and serialization layer with optimized queries and **Protobuf**, cutting response time from **~200ms to ~30ms per keystroke**.
- Integrated LLMs to boost NLU search accuracy from **85% to 92%** and designed a **Graph Neural Network** microservice for link prediction on a financial services platform.
- Simplified microservice data serialization into a minimal API payload, cutting network traffic by **68% (465KB to 148KB)**.

EDUCATION

University of Maryland, College Park

Jan 2024 – Dec 2025

Master of Engineering, Software Engineering | GPA: 3.93

College Park, MD

ACHIEVEMENTS, CERTIFICATIONS & PUBLICATIONS

- **Top 100 Rank (Top 0.06%)**, HackwithInfy National Coding Competition (167,000+ participants); **Runner-up among 95 teams**, WatsonX Chatbot Challenge | [Submission](#)
- **Solved 600+** advanced algorithmic problems; highest rating CodeChef 1799, CodeForces 1370.
- **Claude Code in Action** by Anthropic | [Credential](#) · Published: “Analyzing Twitter Event Hype vs. Reality”, NLP sentiment analysis (IJRAR) | [Paper](#)

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, Cypher (Graph Query), Shell Scripting

AI/ML: LLM integration (Claude, OpenAI, Gemini), RAG, LangChain, LangGraph, MCP servers, vision pipelines, PyTorch, TensorFlow

Backend: FastAPI, Spring Boot, Flask, Node.js, REST, GraphQL, gRPC **Frontend:** Angular (Expert), React, Next.js, RxJS, Tailwind

Cloud & Data: Azure (App Service, Functions, Key Vault, Postgres), AWS (Lambda, SageMaker, S3, API Gateway), Databricks, PostgreSQL, MongoDB, Neo4j, Redis

DevOps & Tools: Docker, Kubernetes, NGINX, Cloudflare, GitHub Actions, CI/CD, Vercel, n8n, Airtable, Claude Code, Cursor, Git, Postman
